

Site for practicing coding:

1. The site is a site of a non-profit organization "Justcode"
2. The site aims to help students practice coding and preparing interviews
3. The 3 processes in the site:
 - a) Produce / Design: Users can type their code online to do some algorithm problems and see whether they figure out the right answer.
 - b) Communicate: Users can discuss different solutions for a problem or interview experience.
 - c) Absorb information: Users can learn some lectures about coding online.
4. My semantic network should include the terms coding, discussion, interview, computer science, contest, lecture, programming language, algorithm, ranking, debug, mock interview, difficulty, time, memory use, views, rating.
